*web business intelligence software

Easy to use, easy to deploy.
Business Intelligence to everyone
in your organization.

*BusinessQ Delivers Reporting and Dashboarding that is incredibly easy to use

BusinessQ provides the insight you need to make better and informed business decisions.

Let BusinessQ tell you the story of your business data in precise, effective and unambiguous way – from monitoring your Sales, overseeing your inventory,

measuring business success, or tracking Key Performance Indicators

It helps companies to see otherwise hidden patterns, to spot business problems on time as well as to identify useful opportunities in their raw data.

*How is BusinessQ Different?

It's an innovative, modern and attractive product. We're constantly developing our software and releasing a new version every 3-4 months with exciting enhancements.

Our focus is on end-user experience; It is brilliantly simple: an average BI user needs only couple of hours (or none at all) of education. It is sleek and intuitive just like the most simple web applications, but with the power and rich functionalities of desktop applications.

Everything in BusinessQ is done easily and happily in simple and intuitive drag-and-drop interface.

The possibilities of BusinessQ Data Visualizations guarantee that you can not produce unfunctional, bad or ugly Report. With just one mouse click you can change the way your data will be displayed.

Our licencing model is unique – it scales with your growing business, while providing you unlimited number of Users forever.

SUMMARY

- Incredibly easy-to-use reporting tool for all user types
- Web software = easy deployment
- Change or analyze your reports by dragging and dropping new data
- Low memory footprint
